

What Is Claimed Is

1. A club-carrying apparatus including a bag, a frame attached to an upper edge of the bag, two lugs formed on the frame, two legs pivotally connected with the lugs, a piece of cloth concealing the frame and defining two cutouts encompassing the lugs, and two shields concealing the lugs and the cutouts.
2. The club-carrying apparatus according to claim 1 wherein each of the lugs includes a shaft formed thereon, and each of the legs includes a hook formed thereon for hooking the shaft.
3. The club-carrying apparatus according to claim 2 wherein each of the lugs includes two brackets between which the shaft extends, and each of the shields includes two walls connected with the brackets.
4. The club-carrying apparatus according to claim 3 wherein each of the brackets includes a recess defined in an external side, and each of the walls includes a ridge formed on an internal side for fitting in the recess of one of the brackets.
5. The club-carrying apparatus according to claim 3 wherein each of the shields includes two fins each formed on an external side of one of the walls thereof for concealing one of the cutouts.
6. The club-carrying apparatus according to claim 2 wherein each of the shields includes a roof formed on the walls and formed with an edge for abutment against one of the legs.
7. A club-carrying apparatus including a bag, a frame attached to an upper edge of the bag, two legs pivotally connected with the frame, and two restraints attached to the frame for restraining the pivotal of the legs.

- 1 8. The club-carrying apparatus according to claim 7 further including
2 two lugs formed on the frame, and the legs are pivotally connected
3 with the lugs.
- 4 9. The club-carrying apparatus according to claim 8 wherein each of the
5 lugs includes a shaft formed thereon, and each of the legs includes a
6 hook formed thereon for hooking the shaft.
- 7 10. The club-carrying apparatus according to claim 9 wherein each of the
8 lugs includes two brackets between which the shaft extends, and each
9 of the restraints includes two walls connected with the brackets.
- 10 11. The club-carrying apparatus according to claim 10 wherein each of
11 the brackets includes a recess defined in an external side, and each of
12 the walls includes a ridge formed on an internal side for fitting in the
13 recess of one of the brackets.
